Experience

Advisory Software Developer, IBM, 2015 – Present
- Core developer for IBM's Carbon for Cloud & Cognitive React component library
- Technical lead for IBM Cloud Pak Experiences. Primarily focusing on building extensive flows for provisioning Cloud Pak clusters as well as building and maintaining the single page React application, Node server, and Segment analytics.
- Developed Autoscaling UI for IBM Bluemix using Node, React, and SCSS
- Developed Kubernetes UI for IBM Cloud using Node, React, and SCSS
- Contributed to IBM's opensource design library (Carbon Components) for button and modal components as well as internal IBM shared components
- Worked closely with UX team to develop look and feel of Kubernetes UI
- Implemented analytics for IBM Kubernetes UI to establish cluster usage data
- Created Slack portal to drive user involvement in IBM Cloud public Slack from 600 to over 5,000 active users

Interactive Developer II, Blackbaud Inc, 2013 - 2015
- Developed splash pages, microsites, and custom fundraiser forms from HTML, CSS, JavaScript, jQuery, and Convio Luminate software
- Simultaneously worked with multiple projects and clients such as Make-a-Wish Foundation and American Cancer Society

Jr. PHP Web Developer, Zimmerman Advertising, 2012 - 2013
- Developed microsites for clients such as Party City, BikeStreet USA, and White Castle using HTML, CSS, JavaScript, jQuery, PHP, and .NET MVC 4

Tools

- React
- JavaScript
- Git version control
- Unit Testing (Jest, Jasmine, Enzyme)
- HTML / CSS
